

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1. (Currently Amended) A photopolymerizable composition comprising a polymerizable compound and a photopolymerization initiator, wherein the polymerizable compound comprises (a) a bifunctional (meth)acrylic acid (thio)ester compound containing a sulfur atom in the molecule represented by the following general formula (2):

wherein R₅ is a chain alkylene group having one or more sulfur atoms in the group or R₅ is the following linking group; R₆ and R₇ are each independently a hydrogen atom or an alkyl group; and Z₁ and Z₂ are each independently an oxygen atom or a sulfur atom with the proviso that one of Z₁ and Z₂ is a sulfur atom in case R₅ is the following linking group:

wherein R₁₃ is an alkyl group, an aralkyl group, an aryl group or a halogen atom; and r is an integer from 0 to 2, and (b) at least one of a (meth)acrylic acid ester compound

represented by the following general formula (1) and a bifunctional (meth)acrylic acid ester compound having a urethane linkage:

wherein R_1 and R_2 are each independently a hydrogen atom or a methyl group; R_3 and R_4 are each independently an alkyl group, an aralkyl group, an aryl group or a halogen atom; m and n are each an integer of 0 to 2; X_1 is an alkylidene group having 1 to 3 carbon atoms; and Y_1 and Y_2 are each independently a poly(oxyalkylene) group with the proviso that at least one of Y_1 and Y_2 is a poly(oxyalkylene) group having a hydroxy group.

2. (Currently Amended) A photopolymerizable composition comprising a polymerizable compound and a photopolymerization initiator, wherein the polymerizable compound comprises (a) a bifunctional (meth)acrylic acid (thio)ester compound containing a sulfur atom in the molecule represented by the following general formula (2):

wherein R_5 is a chain alkylene group having one or more sulfur atoms in the group or R_5 is the following linking group; R_6 and R_7 are each independently a hydrogen atom or an

alkyl group; and Z_1 and Z_2 are each independently an oxygen atom or a sulfur atom with the proviso that one of Z_1 and Z_2 is a sulfur atom in case R_5 is the following linking group:

wherein R_{13} is an alkyl group, an aralkyl group, an aryl group or a halogen atom; and r is an integer from 0 to 2, and (b) a (meth)acrylic acid ester compound represented by the following general formula (1):

wherein R_1 and R_2 are each independently a hydrogen atom or a methyl group; R_3 and R_4 are each independently an alkyl group, an aralkyl group, an aryl group or a halogen atom; m and n are each an integer of 0 to 2; X_1 is an alkylidene group having 1 to 3 carbon atoms; and Y_1 and Y_2 are each independently a poly(oxyalkylene) group having a hydroxy group.

3. (Previously Presented) The photopolymerizable composition according to claim 1, wherein the polymerizable compound further comprises (c) polythiols.

4. (Canceled).

5. (Currently Amended) The composition according to claim [[4]]3, wherein Y_1 and Y_2 groups in the general formula (1) are the following group:

6. (Previously Presented) A cured product obtained by polymerizing the photopolymerizable composition as described in claim 5.
7. (Original) Optical parts made of the cured product as described in claim 6.
8. (Original) A light emitting element made by sealing with the cured product as described in claim 6.
9. (Canceled).
10. (Previously Presented) The composition according to claim 1, wherein Y₁ and Y₂ groups in the general formula (1) are the following group:

11. (Previously Presented) A cured product obtained by polymerizing the photopolymerizable composition as described in claim 1.
12. (Previously Presented) Optical parts made of the cured product as described in claim 11.

13. (Previously Presented) A light emitting element made by sealing with the cured product as described in claim 11.

14. (Previously Presented) The photopolymerizable composition according to claim 2, wherein the polymerizable compound further comprises (c) polythiois.

15. (Canceled).

16. (Currently Amended) The composition according to claim ~~15~~ 14, wherein Y₁ and Y₂ groups in the general formula (1) are the following group:

17. (Previously Presented) A cured product obtained by polymerizing the photopolymerizable composition as described in claim 16.

18. (Previously Presented) Optical parts made of the cured product as described in claim 17.

19. (Previously Presented) A light emitting element made by sealing with the cured product as described in claim 17.

20. (Canceled).

21. (Previously Presented) The composition according to claim 2, wherein Y_1 and Y_2 groups in the general formula (1) are the following group:

22. (Previously Presented) A cured product obtained by polymerizing the photopolymerizable composition as described in claim 2.

23. (Previously Presented) Optical parts made of the cured product as described in claim 22.

24. (Previously Presented) A light emitting element made by sealing with the cured product as described in claim 22.
